## GSM spy transmitter Nokia 1600/2600

Model : B20601

Telephonic interception device. Please, visit also our Spyphones website. Once switched off the cellphone gets into Surveillance Mode; then you can dial its programmed number and listen to environmental conversations. When switched on, the cellphone can be used as a normal one. During monitoring the display is off and the cellphone neither rings nor lights up. Cheap solution for general purposes. Babysitter Employees Wife/husband etc.

**Price : €&nbsp;399,00**
