Nokia 6021, changed into an untraceable device. Every time you start a the phone, the phone will change automatically its IMEI number. The IMEI numbers are produced by the phone randomly and will never be repeated. Interception of conversations made or received by such a phone becomes an impossible mission.

- The IMEI number will also change by every SIM change.

- NEW...ultimate: You can even change the IMEI number of the devices self. Example: put the phone IMEI number of a friend or an enemy.

- Automatic alert is shown when cipher is changed from A5/1 to A5/2 AND when HOPPING is OFF.

Over the past decades, telecommunications interception has developed into a huge worldwide industry. Intelligence agencies, security organizations and police within almost all countries routinely intercept calls that may yield sensitive political, military or economic information.

The use of wiretapping has become so widespread, simple and uncontrolled that you must assume that records of your private calls end up in the wrong hands.

It's not encryption, it does not work point to point, it gives you a 100% security, it's impossible to

Untraceable Phone Nokia

intercept.

It's a 100% application software on low cost telephone, unlocked and four-band, operating in any country of the world, and it does not require data channel.

The only options for a secure line:

1. Untraceable-phones

2. Cryptophone

Price : € 1.763,87
