Case Dimensions: 455 x 345 x 170 centimeters (W x H x D)  
Weight: 5.7 Kg  
Warranty: 1 Year  
FAQQ. What is the Detectnu 500?  
A. Detectnu 500 is the world's first & only IR TeleViewer system to enable the strongest &quot;See Through Clothes&quot; X-Ray Vision to 1,000 meters.  
Q. Is the TIR500 a simple telephoto lens?  
A. No. TIR500 is not a simple telephoto lens but a telephoto IR lens which surfaces is IR multi-coated to maximize the IR transmittance.  
Q. How about the Detectnu camera?  
A. Detectnu 902H3 Ultimate is a monochrome ccd camera which has super high sensitivity to Near IR spectrum.  
Q. What is the Head Mounted Display (HMD)?  
A. HMD is a display device, worn on the head, which has a very small micro display optic in front of each eye. Detectnu HMD shows 40&quot;(inch) of very bright and big virtual screen at 2m distance from your eyes. This is the same as you watch 40&quot; TV at 2m distance. Very spectacle!! Instead of the HMD, you can connect the camera to your home TV, PC, digital camera or camcorder directly.
