Flashball

Model : O80102

The Revolutionary Defense Weapon Designed and produced in France, the Flash-Ball generates the stopping power of a .38 Special. By virtue of projectiles studied to avoid, even at extremely short distances, penetrating a normally clothed person, the Flash-Ball provokes on impact the equivalent of a technical KO. The opponent is then disabled. This major advantage has been observed by security professionals as the Flash-Ball officially equips a large number of administrative agencies. With a dissuasive look and detonation, able to be immediately engaged and with a single or double barrels, the Flash-Ball is light and robust and is adaptable to all situations. Available in several versions, it can be fitted with a wide range of ammunition and accessories, thus making it an impressive and effective intelligent weapon. The Flash-Ball is used in France by several special units of the Police : • B.A.C. (Brigades Anti-Criminalité) • G.I.P.N. (Groupes d'Intervention de la Police Nationale) • R.A.I.D. (Recherche Assistance Intervention Dissuasion) It is also used by several other law enforcement and police forces in the World, who appreciate its maneuverability, its ergonomics, the fire power of its 2 barrels as well as its very deterrent appearance. • SOFT RUBBER BALL. The stopping power of the 28 g soft rubber ball (200 joules at 2.5 meters) is equivalent to that of a 38 Special and achieves the same effect as the punch of a champion boxer. On impact the ball crushes and releases its power over an area of approximately 35 cm². For short distance use (at 12 meters, impact pattern is 30 cm). Attention: For this product our supplier needs a copy of a passport !!
